

# Math 189 Homework 2

Daniel Kurland

13 August, 2026

## Problem 1

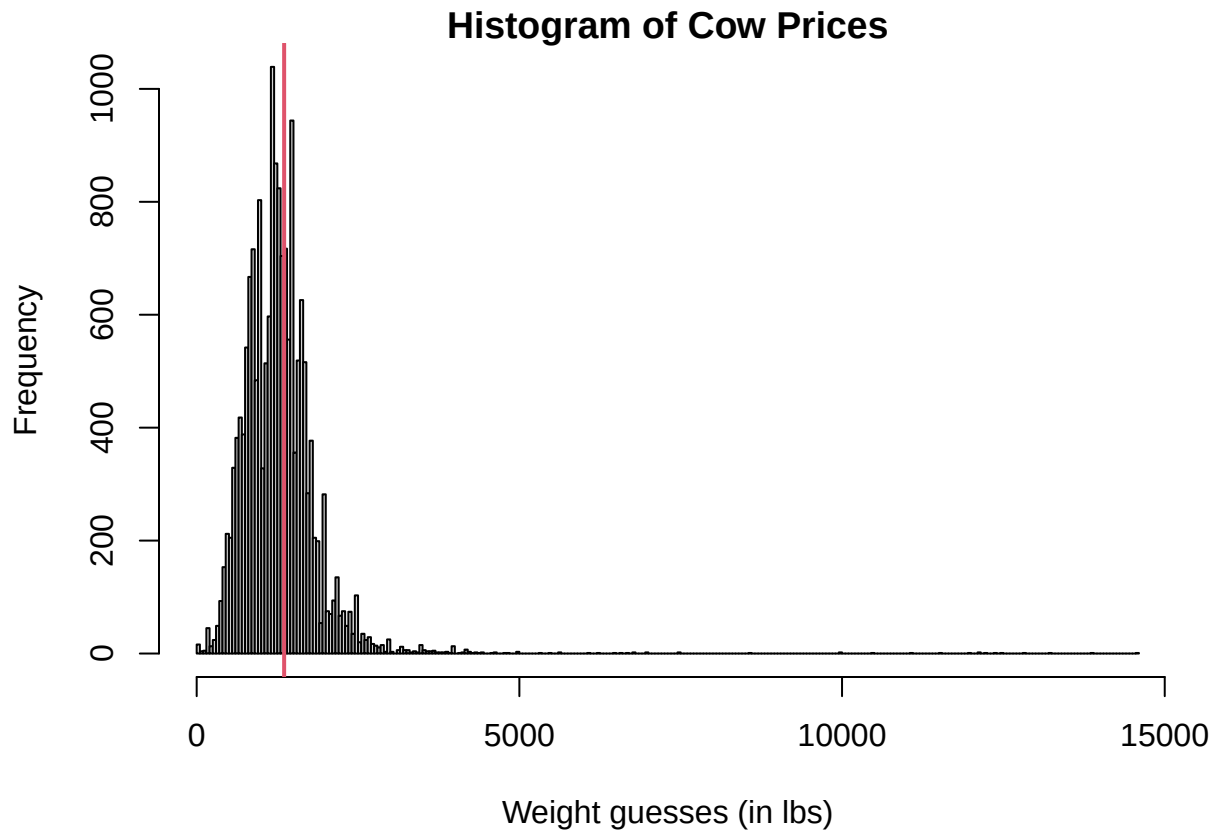

### Part a:

```
data<-read.csv("Planet Money Cow Data - Sheet1.csv")
data = data[, 1]
```

This study is an observational study, or cross sectional survey more specifically.

### Part b:

```
par(mai = c(1, 1, 0.2, 0.2))
hist(data, 500, main="Histogram of Cow Prices", xlab="Weight guesses (in lbs)", ylab="Frequency")
#true weight
abline(v = 1355, col = 2, lwd = 2)
```

Part c:

```
par(mai = c(1,0.2,0.2,0.2))
boxplot(data, horizontal = TRUE, main = "Horizontal Boxplot of Cow Prices",
xlab = "weight guesses (in lbs)", frame.plot = FALSE)
#true weight
abline(v = 1355, col = 2, lwd = 2)
```

**Horizontal Boxplot of Cow Prices**
